Age: 28, single, driving licence

Full-stack web developer

Fascinated by **technical challenges**, I strongly believe that a developer must be part of **every** phase of a product or feature creation: from the understanding of the user's **needs**, to the answer to the question "does my development respond to the user's **problem**?". Concerned about user-centered development and the Lean Startup philosophy, I'm convinced that these concepts can and should apply in every development project.

TECHNICAL SKILLS

- **Back end**: PHP ☆☆☆, Symfony ☆☆, Node.js ☆☆
- **Database**: relational (MySQL ☆☆☆), NoSQL (MongoDB ☆)
- **Front end**: HTML ☆☆☆, CSS ☆☆☆, JavaScript ☆☆☆, ReactJS ☆
- **UX**: concerned about UX design and user-centered design
- **Mobile**: iOS (Swift language ☆), React Native ☆
- **Misc.**: Git ☆☆, agile methods (Scrum ☆☆), unit testing ☆☆

LANGUAGES

- **French**: native speaker
- **English**: full professional ability (TOEIC: 855)
- **Spanish**: basic

SIDE PROJECTS

Suivi.co (since 2015)
- Package tracking website and mobile app
- Languages and tools:
  - Website: Node.js, ReactJS, MongoDB, hosted at Heroku.
  - iOS app: Swift language, currently migrating to React Native.
- Source code available on GitHub.

French eBook about Node.js (2013-2014)
- Free and open source eBook « Redécouvrir Javascript avec Node.js ». Available on GitHub.
- Also, creation of a blog containing technical articles about Node.js.

PROFESSIONAL EXPERIENCE

R&D engineer, Ubiflow (Rennes, France, since 2012)
